SUMMARY

Full stack developer with 3+ years of experience building mobile and web products with React Native, React, TypeScript, Node.js and Laravel. Founded Lengar, where I designed and built Valoo end to end: a digital tipping and team management platform for hospitality, shipped to the App Store and Google Play. Background in UI/UX design, comfortable owning product decisions alongside code. Experienced working remotely and asynchronously with teams in the United States and Argentina. Now looking to join a product team where I can bring what I learned building Valoo end to end.

EXPERIENCE

Founder & Software Engineer | Lengar

Sep 2025 – Present

Buenos Aires, Argentina (Remote)

- Built Valoo, a digital tipping and team management platform for hospitality (iOS, Android, web): customers tip and rate staff via a personal QR code; businesses group staff into teams, pool tips and split them with custom rules.
- Owned the product end to end as a solo founder, from UX/UI design, product decisions and pricing to development: React Native + Expo app in a TypeScript monorepo (pnpm, Docker) and a REST API built with Laravel and MySQL.
- Built a cross-platform design system with shared design tokens and separate web and native UI layers.
- Designed the tip pooling and payout logic and integrated payment checkout with Mercado Pago.
- Set up mobile CI/CD with EAS Build/Submit, shipping builds to the App Store and Google Play.
- Web development and visual identity for clients (Tekun Agropecuaria, Construcserv, Malevo, among others): landing pages, corporate websites, SEO and custom systems.
  Stack: React Native, Expo, TypeScript, Next.js, Node.js, Laravel, PHP, MySQL, Tailwind CSS, Docker, pnpm

Full Stack Developer | RO Medical

Oct 2024 – Sep 2025

Buenos Aires, Argentina (Hybrid)

- Developed and maintained the company's internal management system, improving performance and maintainability.
- Automated administrative data-entry workflows, reducing manual processing time.
- Built and integrated internal REST APIs to connect system modules.
- Redesigned key UI flows to improve usability for internal staff.
  Stack: PHP, MySQL, Node.js, REST APIs, JavaScript, jQuery, AJAX, Bootstrap

Freelance Web Developer | Self-employed

Jun 2023 – Aug 2025

Buenos Aires, Argentina (Remote)

- Built websites, e-commerce stores, admin systems and event platforms for clients including Corte Argentino, Logistran, Parrillas Pigüé, Naistat and Tekun Agropecuaria.
- Delivered responsive design, SEO optimization and automated testing (PHPUnit), plus branding and graphic assets.
- Since September 2025, I have continued this client work through Lengar.
  Stack: Laravel, React, TypeScript, Tailwind CSS, MERN, MySQL, MongoDB, Shopify, Docker

Digital Services Intern | United Soccer League (USL)

Sep 2023 – Dec 2023

Tampa, FL, USA (Remote)

- Maintained and updated the league's WordPress sites and built the team menu for USL League Two and USL W League.

- Delivered UX/UI improvements working remotely and asynchronously with the league's digital team in the US.
